

Hospital Review and Certificate Packet

Integration overview, OPD workflow diagrams, Indian-format certificate samples, and evaluation handoff note

Prepared for Seeman Sir and hospital leadership review | 06 May 2026

Larinova Hospital Integration Readiness

Prepared for: Hospital leadership, medical administration, and hospital IT teams

Prepared by: Larinova

Date: 2026-05-06

1. Purpose

Larinova is an OPD workflow platform for doctors and clinics. It helps doctors manage patient intake, consultation recording/transcription, clinical notes, prescriptions, medical certificates, and follow-up workflows.

This document explains how Larinova can be evaluated by a hospital or clinic today, and how it can later integrate with hospital systems such as HIS, EMR, or interface engines.

2. Current Product Scope

Larinova currently focuses on the OPD workflow:

- Patient registration and profile.
- Appointment and consultation workflow.
- Real-time consultation transcription.
- SOAP-style clinical notes and summaries.
- Prescription/document workflows.
- Medical certificate generation.
- Follow-up and patient communication workflows.

3. Integration Position

Larinova should be presented as:

A clinical workflow product with a clear path to hospital integration.

Larinova should not yet be presented as:

A fully live HL7/HIS/EMR connector already deployed in production.

The recommended hospital discussion is phased:

Phase	Scope	Purpose
Phase 1	Product evaluation	Hospital doctors review the OPD workflow and document output.
Phase 2	Secure API/webhook pilot	Exchange patient, appointment, consultation, prescription, and certificate events.
Phase 3	Interface engine integration	Map Larinova events through Mirth/HL7/FHIR if required by the hospital.
Phase 4	Formal hospital rollout	Monitoring, audit logs, signed documents, support process, and production controls.

4. High-Level Architecture

```

PATIENT / ATTENDANT
  |
  v
Patient intake / appointment booking
  |
  v
LARINOVA DOCTOR APP
  |
  +-- Patient record
  +-- Consultation transcript
  +-- SOAP summary
  +-- Prescription
  +-- Medical certificate
  +-- Follow-up task
  |
  v
LARINOVA API AND DATABASE
  |
  +-- Audit trail
  +-- Document store
  +-- Notification layer
  +-- Integration event queue
  |
  v
INTEGRATION GATEWAY
  |
  +-- REST API / Webhooks
  +-- HL7 adapter, if required
  +-- FHIR adapter, future
  |
  v
HOSPITAL HIS / EMR / INTERFACE ENGINE

```

5. Data Objects for Hospital Review

Data object	Direction	Hospital value
Patient demographics	HIS to Larinova or Larinova to HIS	Avoid duplicate entry.
Appointment/encounter	HIS to Larinova	Open the correct OPD workflow for the doctor.
Consultation summary	Larinova to HIS	Reduce manual doctor documentation.
Prescription	Larinova to HIS or patient	Structured doctor-reviewed output.
Medical certificate	Larinova to HIS/patient/recipient	Doctor-issued certificate with audit trail.
Follow-up task	Larinova internal or to HIS	Patient continuity after visit.

6. Hospital Evaluation Questions

1. Which HIS/EMR is currently used?
2. Does the hospital prefer REST API, webhooks, HL7, FHIR, or Mirth Connect?
3. Who owns the patient master record?
4. Should documents be stored in the HIS, sent to the patient, or both?
5. Does the hospital require physical stamp/signature, digital signature, QR verification, or all three?
6. What are the requirements for audit logs, consent, and data retention?

7. Recommended Next Step

The best next step is a product evaluation meeting where hospital doctors and an IT representative review:

- OPD consultation workflow.
- Medical certificate generation.
- Prescription/document output.
- Proposed integration data flow.
- Required changes before a pilot.

Larinova OPD Workflow Architecture and Flowcharts

Date: 2026-05-06

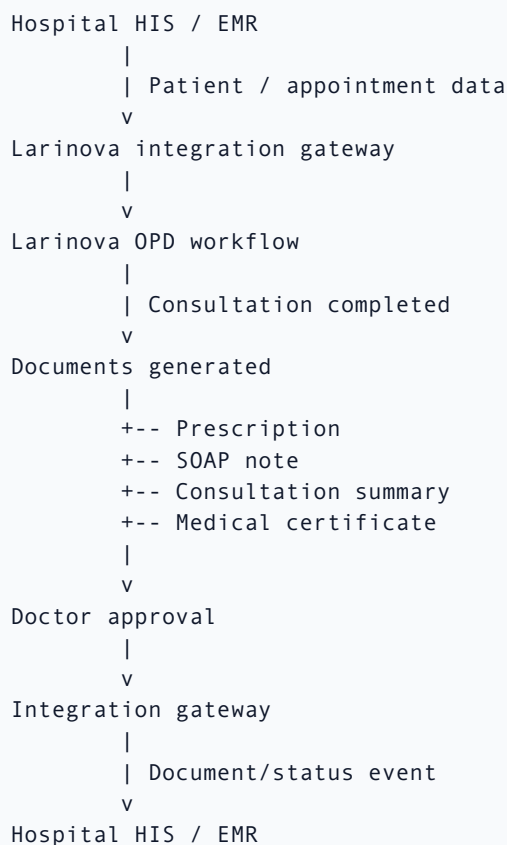

1. OPD Visit Flow

2. Medical Certificate Flow

```
Doctor opens Documents
|
v
Select "Medical Certificate"
|
v
Select patient
|
v
Patient demographics auto-fill
|
v
Select certificate type
|
v
Enter doctor-reviewed clinical details
|
v
Enter Indian-format verification fields
|
+-- Patient signature/thumb impression
+-- Identification mark 1
+-- Identification mark 2, optional
+-- Examination date
+-- Place
|
v
Generate draft certificate
|
v
Doctor verifies dates, diagnosis, registration number
|
v
Doctor signs and stamps
|
v
Certificate is saved to patient record
```

3. Hospital Integration Flow

4. Certificate Control Points

Control point	Why it matters
Authenticated doctor	Prevents anonymous certificate generation.
Patient linked to doctor record	Keeps certificate tied to real OPD workflow.
Doctor registration number	Required trust signal for Indian certificates.
Patient signature/thumb and identification mark	Required in the recommended Indian certificate format.
Draft status before signature	Prevents AI/document draft from being treated as final.
Doctor signature and clinic seal	Required before external use.
Document record copy	Supports register/copy retention.
Future QR/verification link	Helps hospitals, HR, and recipients verify authenticity.

Medical Certificate Standards and Larinova Samples

Date: 2026-05-06

Purpose: Show the Indian-format certificate fields now supported by Larinova and provide samples generated from the current Larinova certificate builder.

1. Indian Format Checklist

The Indian Medical Council professional conduct regulations recommend that medical certificates record:

- Patient signature or thumb impression.
- Patient address.
- At least one patient identification mark.
- Certificate prepared in the recommended leave/fitness format.
- Doctor registration number on certificates.
- Doctor signature and seal before external use.
- Copy/details retained in a medical-certificate register.
- Truthful, non-misleading clinical content.

2. Larinova Certificate Controls

Larinova's certificate flow is designed around doctor control:

- Certificate is created only inside an authenticated doctor workflow.
- Patient is selected from the doctor-linked patient record.
- Patient age, sex, and address are pulled from the patient record.
- Doctor name, degrees, registration number, council, clinic, and phone are included.
- Certificate includes examination date, place, patient signature/thumb, and identification marks.
- Certificate remains a draft until the doctor verifies and signs/stamps it.
- Certificate content is saved to the document record, creating an internal copy/register trail.

3. Sample Certificates Generated From Larinova

The following sample outputs use demo patient and doctor details. They are not real medical certificates and must not be used externally without physician review, patient verification, doctor signature, and clinic/hospital seal.

Sample 1: Sick Leave Certificate

Sick Leave Certificate

Certificate Register No.: MC-20260506-SAMPLE-SICK-LEAVE

Date of Issue: 06 May 2026

Place: Bengaluru

Patient Verification:

Patient signature/thumb impression: Signature collected in clinic

Identification mark 1: Mole on left cheek

Identification mark 2: Scar on right forearm

Patient Details:

Name: Raghu Kumar

Age/Sex: 31/Male

Address: Koramangala, Bengaluru

Certifying Registered Medical Practitioner:

Dr. Ananya Rao, MBBS, MD

General Medicine

Registration No.: KMC/12345 (Karnataka Medical Council)

Clinic/Hospital: Larinova Family Clinic, Indiranagar, Bengaluru

Phone: +91 98765 43210

Certificate Statement:

I, the undersigned registered medical practitioner, certify that after careful examination on 06 May 2026, Mr./Ms. Raghu Kumar, whose signature/thumb impression and identification marks are recorded above, is suffering from Acute viral fever. Treatment provided: Clinical examination, antipyretics, hydration, and rest advised.

After examination, I recommend 3 days of sick leave from 06 May 2026 to 08 May 2026 for proper rest and recovery.

The patient is advised to Rest at home, maintain hydration, and avoid strenuous activity.

Remarks:

Review if fever persists beyond 48 hours.

Brief Case Resume:

Nature of illness/condition: Acute viral fever

Assessment/treatment: Clinical examination, antipyretics, hydration, and rest advised

Probable duration / validity: 06 May 2026 to 08 May 2026

Advice/restrictions: Rest at home, maintain hydration, and avoid strenuous activity.

Signature and seal of Registered Medical Practitioner

Dr. Ananya Rao, MBBS, MD

Registration No.: KMC/12345 (Karnataka Medical Council)

DRAFT DOCUMENT - Requires physician review, verification of dates/diagnosis, patient signature/thumb impression, doctor signature, and clinic/hospital seal before use.

Sample 2: Work From Home Certificate

Work From Home Certificate

Certificate Register No.: MC-20260506-SAMPLE-WORK-FROM-HOME

Date of Issue: 06 May 2026

Place: Bengaluru

Patient Verification:

Patient signature/thumb impression: Signature collected in clinic

Identification mark 1: Mole on left cheek

Identification mark 2: Scar on right forearm

Patient Details:

Name: Raghu Kumar

Age/Sex: 31/Male

Address: Koramangala, Bengaluru

Certifying Registered Medical Practitioner:

Dr. Ananya Rao, MBBS, MD

General Medicine

Registration No.: KMC/12345 (Karnataka Medical Council)

Clinic/Hospital: Larinova Family Clinic, Indiranagar, Bengaluru

Phone: +91 98765 43210

Certificate Statement:

I, the undersigned registered medical practitioner, certify that after careful examination on 06 May 2026, Mr./Ms. Raghu Kumar, whose signature/thumb impression and identification marks are recorded above, has been under my care for Post-viral fatigue. Treatment provided: Clinical review and supportive care.

Based on clinical assessment, the patient is advised to work from home for 5 days, from 06 May 2026 to 10 May 2026, to support recovery while avoiding unnecessary exertion or exposure.

Advice:

Avoid commute, take short rest breaks, and continue hydration.

Remarks:

Can continue desk work remotely if symptoms remain mild.

Brief Case Resume:

Nature of illness/condition: Post-viral fatigue

Assessment/treatment: Clinical review and supportive care

Probable duration / validity: 06 May 2026 to 10 May 2026

Advice/restrictions: Avoid commute, take short rest breaks, and continue hydration.

Signature and seal of Registered Medical Practitioner

Dr. Ananya Rao, MBBS, MD

Registration No.: KMC/12345 (Karnataka Medical Council)

DRAFT DOCUMENT - Requires physician review, verification of dates/diagnosis, patient signature/thumb impression, doctor signature, and clinic/hospital seal before use.

Sample 3: Medical Fitness Certificate

Medical Fitness Certificate

Certificate Register No.: MC-20260506-SAMPLE-FITNESS

Date of Issue: 06 May 2026

Place: Bengaluru

Patient Verification:

Patient signature/thumb impression: Signature collected in clinic

Identification mark 1: Mole on left cheek

Identification mark 2: Scar on right forearm

Patient Details:

Name: Raghu Kumar

Age/Sex: 31/Male

Address: Koramangala, Bengaluru

Certifying Registered Medical Practitioner:

Dr. Ananya Rao, MBBS, MD

General Medicine

Registration No.: KMC/12345 (Karnataka Medical Council)

Clinic/Hospital: Larinova Family Clinic, Indiranagar, Bengaluru

Phone: +91 98765 43210

Certificate Statement:

I, the undersigned registered medical practitioner, certify that after careful examination on 06 May 2026, Mr./Ms. Raghu Kumar, whose signature/thumb impression and identification marks are recorded above, was examined for Fitness for routine office duty after viral illness. Assessment/treatment recorded: Examined, afebrile, vitals stable, and clinically improved.

Based on the clinical assessment, the patient is medically fit for routine daily activities from 09 May 2026 to 08 Jun 2026, subject to the advice and restrictions below.

Advice / Restrictions:

Resume routine activity gradually and avoid heavy exertion for one week.

Remarks:

Fit for routine duties subject to workplace policy.

Brief Case Resume:

Nature of illness/condition: Fitness for routine office duty after viral illness

Assessment/treatment: Examined, afebrile, vitals stable, and clinically improved

Probable duration / validity: 09 May 2026 to 08 Jun 2026

Advice/restrictions: Resume routine activity gradually and avoid heavy exertion for one week.

Signature and seal of Registered Medical Practitioner

Dr. Ananya Rao, MBBS, MD

Registration No.: KMC/12345 (Karnataka Medical Council)

DRAFT DOCUMENT - Requires physician review, verification of dates/diagnosis, patient signature/thumb impression, doctor signature, and clinic/hospital seal before use.

Sample 4: Medical Diagnosis Certificate

Medical Diagnosis Certificate

Certificate Register No.: MC-20260506-SAMPLE-DIAGNOSIS

Date of Issue: 06 May 2026

Place: Bengaluru

Patient Verification:

Patient signature/thumb impression: Signature collected in clinic

Identification mark 1: Mole on left cheek

Identification mark 2: Scar on right forearm

Patient Details:

Name: Raghu Kumar

Age/Sex: 31/Male

Address: Koramangala, Bengaluru

Certifying Registered Medical Practitioner:

Dr. Ananya Rao, MBBS, MD

General Medicine

Registration No.: KMC/12345 (Karnataka Medical Council)

Clinic/Hospital: Larinova Family Clinic, Indiranagar, Bengaluru

Phone: +91 98765 43210

Certificate Statement:

I, the undersigned registered medical practitioner, certify that after careful examination on 06 May 2026, Mr./Ms. Raghu Kumar, whose signature/thumb impression and identification marks are recorded above, has been evaluated and diagnosed with Acute gastroenteritis. Assessment/treatment recorded: Clinical examination, oral rehydration, diet advice, and symptomatic treatment.

This certificate is issued to document the diagnosis and care period from 06 May 2026 to 07 May 2026.

Advice:

Continue fluids, bland diet, and return if vomiting or dehydration worsens.

Remarks:

Diagnosis based on OPD clinical assessment.

Brief Case Resume:

Nature of illness/condition: Acute gastroenteritis

Assessment/treatment: Clinical examination, oral rehydration, diet advice, and symptomatic treatment

Probable duration / validity: 06 May 2026 to 07 May 2026

Advice/restrictions: Continue fluids, bland diet, and return if vomiting or dehydration worsens.

Signature and seal of Registered Medical Practitioner

Dr. Ananya Rao, MBBS, MD

Registration No.: KMC/12345 (Karnataka Medical Council)

DRAFT DOCUMENT - Requires physician review, verification of dates/diagnosis, patient signature/thumb impression, doctor signature, and clinic/hospital seal before use.

Sample 5: Caretaker Certificate

Caretaker Certificate

Certificate Register No.: MC-20260506-SAMPLE-CARETAKER

Date of Issue: 06 May 2026

Place: Bengaluru

Patient Verification:

Patient signature/thumb impression: Signature collected in clinic

Identification mark 1: Mole on left cheek

Identification mark 2: Scar on right forearm

Patient Details:

Name: Raghu Kumar

Age/Sex: 31/Male

Address: Koramangala, Bengaluru

Certifying Registered Medical Practitioner:

Dr. Ananya Rao, MBBS, MD

General Medicine

Registration No.: KMC/12345 (Karnataka Medical Council)

Clinic/Hospital: Larinova Family Clinic, Indiranagar, Bengaluru

Phone: +91 98765 43210

Certificate Statement:

I, the undersigned registered medical practitioner, certify that after careful examination on 06 May 2026, Mr./Ms. Raghu Kumar, whose signature/thumb impression and identification marks are recorded above, has been under my care for Post-operative recovery requiring assisted care. Treatment provided: Clinical review and recovery monitoring.

The patient requires caretaker support for 9 days, from 06 May 2026 to 14 May 2026, based on the present clinical condition and recovery needs.

Care Instructions:

Needs support with mobility, medication schedule, and follow-up visit.

Remarks:

Caretaker support advised during the stated recovery period.

Brief Case Resume:

Nature of illness/condition: Post-operative recovery requiring assisted care

Assessment/treatment: Clinical review and recovery monitoring

Probable duration / validity: 06 May 2026 to 14 May 2026

Advice/restrictions: Needs support with mobility, medication schedule, and follow-up visit.

Signature and seal of Registered Medical Practitioner

Dr. Ananya Rao, MBBS, MD

Registration No.: KMC/12345 (Karnataka Medical Council)

DRAFT DOCUMENT - Requires physician review, verification of dates/diagnosis, patient signature/thumb impression, doctor signature, and clinic/hospital seal before use.

Sample 6: Recovery Certificate

Recovery Certificate

Certificate Register No.: MC-20260506-SAMPLE-RECOVERY

Date of Issue: 06 May 2026

Place: Bengaluru

Patient Verification:

Patient signature/thumb impression: Signature collected in clinic

Identification mark 1: Mole on left cheek

Identification mark 2: Scar on right forearm

Patient Details:

Name: Raghu Kumar

Age/Sex: 31/Male

Address: Koramangala, Bengaluru

Certifying Registered Medical Practitioner:

Dr. Ananya Rao, MBBS, MD

General Medicine

Registration No.: KMC/12345 (Karnataka Medical Council)

Clinic/Hospital: Larinova Family Clinic, Indiranagar, Bengaluru

Phone: +91 98765 43210

Certificate Statement:

I, the undersigned registered medical practitioner, certify that after careful examination on 06 May 2026, Mr./Ms. Raghu Kumar, whose signature/thumb impression and identification marks are recorded above, has been under my care for Recovered viral illness. Treatment provided: Reviewed after treatment and rest; symptoms improved.

Based on the clinical review, the patient has recovered sufficiently by 06 May 2026 and may return to work/classes or routine activity from that date, subject to the advice below.

Advice:

Resume routine activity gradually and return for review if symptoms recur.

Remarks:

Recovered sufficiently for routine activity.

Brief Case Resume:

Nature of illness/condition: Recovered viral illness

Assessment/treatment: Reviewed after treatment and rest; symptoms improved

Probable duration / validity: 01 May 2026 to 06 May 2026

Advice/restrictions: Resume routine activity gradually and return if symptoms recur.

Signature and seal of Registered Medical Practitioner

Dr. Ananya Rao, MBBS, MD

Registration No.: KMC/12345 (Karnataka Medical Council)

DRAFT DOCUMENT - Requires physician review, verification of dates/diagnosis, patient signature/thumb impression, doctor signature, and clinic/hospital seal before use.

Larinova Product Evaluation Handoff Note

Date: 2026-05-06

Short Message

Larinova is ready to be evaluated as an OPD workflow product for doctors and clinics. The main review areas are:

1. Consultation workflow.
2. Real-time transcription and clinical note generation.
3. Prescription/document workflow.
4. Medical certificate generation.
5. Future hospital integration path.

What To Show First

1. Doctor dashboard.
2. Patient record.
3. Consultation recording/transcription.
4. Generated summary/prescription.
5. Medical certificate creation from patient record.
6. Hospital integration architecture document.

What To Say Clearly

- Larinova is not an anonymous certificate generator.
- Certificates are created inside the authenticated doctor workflow.
- Certificate output follows the expected Indian medical certificate structure more closely now: doctor registration, patient address, patient signature/thumb impression, identification mark, examination date/place, diagnosis/nature of illness, duration, doctor signature/seal area, and retained document record.
- HL7/HIS integration is not claimed as live yet. The architecture and phased pathway are ready for hospital discussion.

Questions for Evaluator

1. Does this OPD workflow match how doctors currently work?
2. Which part saves the most time: intake, transcription, prescription, certificate, or follow-up?
3. What certificate formats do hospitals/employers usually reject?
4. Does the hospital require digital signature, physical stamp, QR verification, or all three?
5. What integration route does the hospital prefer: REST API, webhooks, HL7, FHIR, or Mirth?

Known Next Product Work

- Add QR/verification page.
- Add doctor signature/seal upload.
- Add certificate finalization workflow.
- Add document share audit.
- Add hospital integration event schema.
